Youth Finance App Decision Log

Key decisions that shaped our app for young people aged 16–25.

Life Powered by Tech Hackathon · Fri 12:30 → Sat 11:00

Fri 12:45
What are we building?

D1

Finance app for ages 16–25

KEY INSIGHT

Young people need simple help with budgets, spending and saving.

EXPECTED OUTCOME

A clear purpose and target user that fits the theme.

Fri 16:15
How will it run?

D2

Build it as a PWA with Python

KEY INSIGHT

One app for every phone, built with the skills we have.

EXPECTED OUTCOME

Works on any phone with no app-store install.

`commit 39b7781`

Sat 01:15
Who can use it?

D3

Support English, French and Kreol

KEY INSIGHT

Language should never be a barrier to managing money.

EXPECTED OUTCOME

Accessible to all Mauritian users.

`commit e6a6709`

Sat 03:15
What data powers it?

D4

Use real data: Lending Club risk model and CPI inflation

KEY INSIGHT

Real data beats synthetic data and meets the rules.

EXPECTED OUTCOME

More accurate loan risk and inflation-aware savings goals.

`commit 88250d5`

Sat 06:15
What if users refuse details?

D5

Make financial info optional

KEY INSIGHT

IET "Permission Denied": key features must still work.

EXPECTED OUTCOME

Core features work even if users share nothing.

`commit 61476a8`

Sat 09:00 · SURPRISE CARD
How do users sign up?

D6

Sign up with email *or* phone number

KEY INSIGHT

No single required detail; either one unlocks every feature.

EXPECTED OUTCOME

Users choose the contact method they are comfortable with.

Sat 09:00
Which permissions do we need?

D7

Dropped microphone input and user photo

KEY INSIGHT

Only ask for what the app truly needs.

EXPECTED OUTCOME

Fewer permissions and less privacy risk.

Sat 10:45
When do we stop building?

D8

Freeze the build and submit by 11:00

KEY INSIGHT

A stable demo beats last-minute features.

EXPECTED OUTCOME

A working app submitted on time.
